<sup>1</sup> The Census of Fatal Occupational Injuries (CFOI) has published data on fatal occupational injuries in the United States since 1992. During this time, the classification systems and definitions of many data elements have changed. Please see the CFOI Definitions page (<http://www.bls.gov/iif/oshcfddef.htm>) for a more detailed description of each data element and their definitions.

<sup>2</sup> Metropolitan Statistical Area (MSA) data were first published beginning with 1999 data. Metropolitan statistical areas used in this table are based on definitions from the Office of Management and Budget (OMB). OMB MSA definitions are predicated upon combinations of state and county identifiers. In 1999, CFOI collected township data, and not county data, for certain New England states. As such, MSA data were not available for some New England MSAs in 1999.

Note: Data for all years are revised and final. Totals for major categories may include subcategories shown separately. Dashes indicate no data reported or data that do not meet publication criteria. N.E.C. means "not elsewhere classified." CFOI fatal injury counts exclude illness-related deaths unless precipitated by an injury event.
